DARWIN MARTIN HOUSE RESTORATION & RECONSTRUCTION

Buffalo, New York

HHL began designing the restoration of this internationally known Frank Lloyd Wright-designed National Historic Landmark prairie house in 1992. Remaining historic fabric, demolished building and site elements are being restored to the 1907 date of first occupancy by the family. Multiple phases of work began with terrace and roof restoration, and continued with foundation repairs and removal of non-historic fabric. Reconstruction of the demolished pergola, conservatory, carriage house and the installation of air conditioning, geothermal wells and other 21st Century technology systems shall enable the facility to function as a Historic House Museum.

HHL is also restoring the adjacent Barton House, built as part of the historic complex, 143 Jewett Avenue to be used for MHRC administrative offices, and is coordinating all work on and adjacent to the historic campus, including a new visitor center.

Project Size: 25,000 sf
Project Cost: \$30,000,000
Complete: Phased 1997-2006
Client: Martin House Restoration Corporation
Reference: Mary Roberts
Telephone: (716) 856-3858
